Losing bet tells of post-election harassment

By Nelson L. Sison

POST-ELECTION HARASSMENT AND PERSECUTION have become a common sight in the Philippines. It is a sad reality that many of the winners of the 2010 elections are now being harassed and persecuted by the losing candidates and their supporters. This is a clear sign of the lack of respect for the rule of law and the democratic process.

Opening Salaries
The 2010 election results have been a source of controversy. The winning candidates have been accused of cheating and of using不正当手段 to win. This has led to a loss of confidence in the electoral process.

According to the chemical formula, the structure of the molecule is shown in Figure 1. The molecule is a dimer of the monomer, which is a 1,2-dithiolane-3-thione derivative. The monomer is a five-membered ring containing two sulfur atoms and one carbon atom. The carbon atom is double-bonded to a sulfur atom and single-bonded to two sulfur atoms. The two sulfur atoms are also single-bonded to each other. The dimer is formed by the reaction of two monomers, with the loss of two sulfur atoms.
